

Big Health Forum on the Belt and Road

1. Background and Objectives

People-to-people bonds is one of five major cooperation areas for the Belt and Road initiative to promote exchanges and dialogues between different cultures. Big health industry is a cluster of different industries, for which the core industry is food industry, the periphery industries are related to planting, breeding, service, tourism, pension and so on. Development of big health industry may support the achievement of people-to-people bonds. Establishment of health corridor of the Belt and Road is helpful for promoting big health industry. Thus, we hope to hold big health forum of the Belt and Road to launch the health corridor activity and introduce the related publicity.

2. Overview of the Plan

- Host: Institute of Process Engineering, Chinese Academy of Sciences, Asia Pacific Federation of industry and Commerce (Malaysia), China health care association.
- Trainer: Experts from Asia Pacific Federation of Industry and Commerce (Malaysia), business owner or entrepreneur from Malaysia, Indonesia and Thailand.
- Trainee: About 40-50 persons
- Duration: 7 days (date to be determined)
- Location: Kuala Lumpur, Malaysia
- Courses: Policy interpretation on the Belt and Road Initiative, market analysis of functional food in China, development tendency of food industry, and analysis of industrial chain on functional food.

3. Expected Outcomes

- Attract more experts from countries along the Belt and Road to participate the international cooperation and multinational cooperation. The cooperation may

initiate from big health industry and gradually extend to big data, new energy and materials, and environmental protection within 5 to 10 years.

- The forum is helpful for promoting big health industry, implementing the Belt and Road Initiative and promoting exchanges and dialogues between different cultures.
- Increase the influence of ANSO in local countries.
